

## Mourning for Prof. Dr Wilko Weichert

The SATURN<sup>3</sup> consortium mourns the loss of its co-coordinator Prof. Dr. Wilko Weichert, who passed away much too early. Wilko was not only a remarkable person but also an outstanding personality in his professional and private life.

Wilko Weichert was one of the central driving forces behind the SATURN<sup>3</sup> research project. With Wilko Weichert, we are losing a committed and outstanding cancer researcher who was extremely energetic and instrumental in shaping our project from idea to implementation and who rendered outstanding services to cancer research. His contribution will never be forgotten and his influence will be felt for a long time to come.

As consortium member from the very beginning and as a person, he leaves a big gap in SATURN<sup>3</sup> and in the scientific community. With his cheerful, always very approachable manner and engaging nature, he greatly enriched our consortium. He was always willing to share his time and knowledge with others, always eager to help.

During this difficult time, we would like to extend our sincere condolences to Wilko's family, friends, and close associates. May they take comfort in the memories of shared moments and in the gratitude for his extraordinary life. May this carry them through these difficult days.

We bid farewell to a valued friend, colleague, and dedicated co-ordinator whom we will cherish in honourable memory.

On behalf of the SATURN<sup>3</sup> Consortium,

Prof. Dr. Jens Siveke, Coordinator

Prof. Dr. Andreas Trumpp, Co-Coordinator
